

RIGHT HOMES

A GREEN SMART HOME

REDUCE, REUSE, RECYCLE

This home has incorporated water- and energy-saving features, as well as innovative design principles to accommodate the needs of a growing family. The owners wanted to reduce, reuse and recycle as much as they could from the existing block. Rather than demolishing their original weatherboard home, they sold it on Gumtree and had it transported off-site. From here, Right Home's in-house designer and builder worked in collaboration with the owners to bring their design goals to life.

A rare collection of composite materials, including recycled bricks, timber and exterior and interior finishes, as well as reverse brick veneer and exposed steel lintels, was utilised. These products along with a host of other sustainable materials have created a home with an 8-star energy rating.

In terms of aesthetics, the owners wanted an open-plan home with good ventilation, a light and airy atmosphere, and a seamless flow between the indoor and outdoor areas. The final product is a beautiful example of the company's exacting standards, and the team's ability to meet a brief.

Right Homes is a small, boutique residential building company that was established in 2006 by directors Gary and Anna Wright. Together, they are committed to creating outstanding properties by producing affordable and sustainable homes for the future.

Right Homes offers a personalised service that will ensure clients have an experience that is both positive and hassle-free when building their new home.

The team at Right Homes is passionate about creating individual designs to suit lifestyles and expectations, demonstrating that energy-efficiency and high-star ratings can be affordable. Right Homes can include passive solar designs and sustainable extras, constructing everything from individual homes to unit developments.

In a short time, Right Homes has gained a reputation in the marketplace as a hard-working, ethical business, driven by the shared passion of its employees. Right Homes is one of Perth metropolitan's most awarded small builders, consistently winning awards both at a state and national level.
